Backstretch—Here is a giant of a bull, straight beef, with the frame & muscling that every breeder is looking for today. Coming off of pasture, he has never weighed less than a ton after heavy breeding and with mostly ruffage fleshes easily. He weighed 2435 in June and will probably beat that by sale day easily. No females from Backstretch have ever left our ranch. However, since coming this far we will offer 4 of our best cows with Backstretch heifer calves and most of the cows will be rebred to Backstretch. These cows will be deep in bennett breeding. Here is probably one of the bulls Midwest breeders have been looking for, size, beef, polled.
